

I Wonder What the Sun Knows

I wonder what the sun knows
I wonder why the sun glows
Making the colors of the rainbow
Gonna ask the rain what the rain knows

I wonder what the rain knows
I wonder where the water goes
Everything green grows
Gonna ask the green what the green knows

I wonder what the green knows
Trees reaching up to drink the sunshine
I hear them whispering in the wind
Gonna ask the wind what the wind knows

I wonder what the wind knows
I wonder why the wind blows
Making the waves upon the ocean
Gonna ask the ocean what the ocean knows

I wonder what the ocean knows
I wonder why the ocean grows
Rising up with the pull of the moon tide
Gonna ask the moon what the moon knows

I wonder what the moon knows
I wonder why the moon glows
A silver mirror for the sunlight
Gonna ask the sun what the sun knows

I wonder what the sun knows
