

Natural Education

A long, long time ago
We were people of the planet
Who walked and worked this land
With respect for the Lady who ran it

But now we've forgotten how
To live in natural balance
So now we face the future
With a mighty challenge

Rise up and get yourself a natural education
We are the changing tide and the bridging
generation

We learn from Mother Nature
To grow the food we eat
The most important grocery store
Is the soil beneath our feet

Plants and trees and thriving seas
Provide the air we breathe
Hydrogen, Hydrogen, Oxygen
Brings life to everything

We learn from Mother Nature
To take only what we need
There's no place for selfishness,
Dishonesty or greed

Rise up and get yourself a natural
education...
Mother Earth's our teacher and our source
of inspiration

We learn from Mother Nature
Conservation of energy
Nothing wasted, nothing lost
Symbiotic reciprocity

We learn from Mother Nature
Bio-diversity
The greater range and variety
The greater productivity

We learn from Mother Nature
To be a generous community
Winning back the planet's trust
And natural immunity

Rise up and get yourself a natural
education...
We come from deep inside a love for all
Creation
