A journey of a thousand steps

Begins with the first one

We are born without a clue it's true

Yet within the very temple you are

There are a million marvelous works

You can do with you, with you

The colors of the rainbow up in the sky

Are the same that color you and I

R O Y G B I V

How will ya know what's true until you try it?

Human made in the image of creation

You were born to get a natural education

If you're ever wondering what you are

It's in everything from seed to star
